

29 November 2018

Dear participants and colleagues,

Two exciting conference days in Solingen are history. While it will take some time for all of the highlighted e-bus systems to deliver concrete results with regards to deployment patterns, operating economics and ecological balance, it is clear that there has already been significant technological progress during the past two years and the extensive interest in our conference proves this.

We would like to **thank all of the panelists** for their excellent presentations and **applaud all of our sponsors** for their support. **Additional thanks go to Stadtwerke Solingen** for their kind contributions and the opportunity to have demonstration drives with the innovative BOB.

Naturally, we also want to extend our **sincere gratitude to you**, our valued conference guests! Thank you for your interest, your participation and at times your endurance during the many different presentations.

As previously mentioned, we are now glad to send you the convenient [web link](#), where you may download all of the conference presentations during the next 30 days. Later on, you will find them in our knowledge library at www.trolleymotion.eu

Once again, we very much appreciate your attendance, thus enabling such an international exchange of know-how and experience.

Best regards - the organizers:

Daniel Steiner, President
Arnulf Schuchmann, Secretary General
Alexandra Scharzenberger, Organizer association/conference
